

Please read this manual carefully before installing and using the spots. Do this for your own safety and to prevent damage of the product. This manual is applicable to the LED (deck) recessed spots. The set is delivered ready for use with the amount of spots you selected, including one meter wiring and 1 transformer.

1

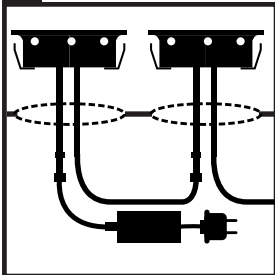

First, check whether all the parts are contained in the box, and test the set before installing it in its permanent place.

2

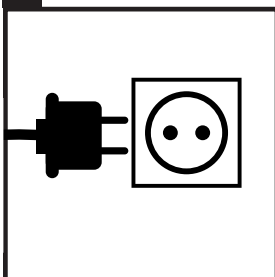

Drill the holes, size 30 mm, at the desired place. Connect a LED recessed spot, through the hole, to the connector.

3

Then connect the next recessed spot, through the hole, to the first recessed spot. Continue like this. Finally, press the LED recessed spots into the holes.

4

Now insert the plug of the transformer into a socket. We recommend to switch off the branch circuit beforehand!

Your lightening is now ready for use. We wish you the best of luck with your purchase.
