LED SPIKE LIGHT
# CAMPO

INSTALLATION MANUAL

1
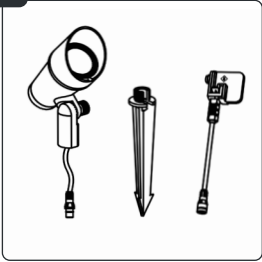

First, check if all parts are present.

2

Twist the spike onto the fixture. Note: Place the cable in the notch of the spike.
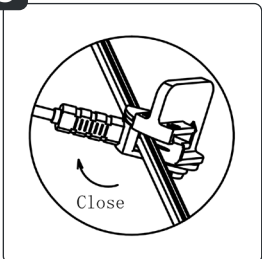

3

Insert the spike light into the desired location in the ground.

4

Now connect the coupling piece of the spike light to the product cable connector.

5

Attach the product connector to the 12-volt main cable and tighten the connector onto the main cable.

Your lighting is now ready for use.
