

1

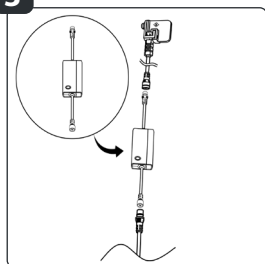

First, check if all parts are present. A Hamulight strip dimmer (SKU L2522) must also be present. Please note: this product is not included as standard.

2

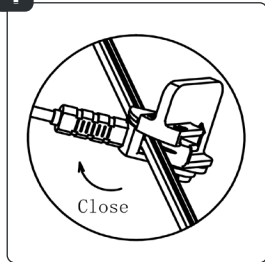

If necessary, the strip can be cut as desired and the part where it has been shortened can be closed with the supplied closing cap. Then position the strip in the desired location.

3

Now connect the coupling piece of the strip to the coupling piece of the strip dimmer and connect the coupling piece of the strip dimmer to the product cable connector.

4

Place the 12-volt main cable between the product cable connector and snap the connector onto the main cable. Your lighting is now ready for use.
