

Cree LED ground light Trofa | warm white | 5 watt | square

Product Images

Short Description

The Cree LED ground light Trofa is extremely well suited for illuminating a tree, shrub or object between 5 and 7 metres in height. This ground light also does a good job of illuminating a facade. The Trofa ground light consumes 5 watts and operates on a voltage of 230 volts.

Description

The Cree LED Trofa ground light creates a pleasant atmosphere in your garden with its 30° light angle and warm white light colour (2700k). The ground light is energy-efficient and consumes only 3 watts. The spotlight is weather-resistant thanks to its IP value of 67. IP67 indicates that the Cree LED ground lights are dustproof and resistant to splash and spray water. The ground light is made of stainless steel and the housing has a notch for the cable. This prevents the cable from being crushed under the ground. The cable attached to the ground light is 3-core and 1.5 metres long.

You must connect the 3-core cable directly to a 230-volt power cable. Our waterproof cable connectors make it possible to connect the ground light to the 230-volt cable. You must add these separately to your order and they are not supplied with the Cree LED ground light.

The ground spotlight can be operated in various ways. For example, you can choose to connect it to a twilight switch or motion detector. Other options include operation with the Moon or Novex remote control, or the Hamulight app. To make use of these options, you need to purchase the wifi garden LED receiver in addition to the relevant article. When you purchase the wifi garden LED receiver, you get free access to the app.

Tip: We advise you to lay 230-volt cables 60 cm underground so that they are safe and neatly concealed.

You will receive a 5-year warranty on the Trofa LED ground light. More product information about the Trofa ground light can be found in the product specifications. Do you have a question for our LED specialists? Then feel free to contact us.

Additional Information

Article number	L2089
EAN code	8721122621127
Brand	Hamulight
Suitable for	Outside
Light color	Warm white (2700K)
Input voltage	230V AC
LED chip	Cree
Consumption	5 watt
Dimmable	No
Lumen per LED (including lens)	500 lm
Color Rendering Index (CRI)	>82
Light angle	23 Degrees
Length	78 mm
Width	78 mm
Height	130 mm
Hole size	70 mm
Cabling per LED	100 cm
Transformer required?	No
Material	Stainless steel
Housing color	Nickel
IP value	IP67
IK value	IK08
Quality mark	CE, Rohs
Warranty	5 years
Energy label old	A++
Energy label new	G
