

Cree LED ground light Faro | warm white | 10 watt | round

Product Images

Short Description

The Cree LED ground light Faro is suitable for illuminating a tree, shrub or object between 7 and 10 metres in height. This ground light is also suitable for illuminating a façade. The Faro ground light has a consumption of 10 watts and works on 230 volts.

Description

The Cree LED Faro ground light is energy-efficient and environmentally friendly. With the beautiful warm white light (2700k) and a light angle of 23 degrees. The ground lights are made of stainless steel and, thanks to the IP value of 67, are fully weatherproof and ideal for outdoor use. The housing of this ground light has a notch for the cable. This prevents the cable from being crushed under the ground. The 3-core cable attached to the Faro ground light is 1.5 metres long.

You must connect the 3-core cable directly to the 230-volt ground cable. Our waterproof cable connectors can be used to attach the cable from the Faro ground light to the 230-volt cable. These waterproof cable connectors are not supplied as standard and must therefore be ordered separately via our webshop.

There are several ways to operate the ground spot. For example, you can connect the ground spots to a twilight switch or motion detector, but you can also opt for operation with the Moon or Novex remote control, or the Hamulight app. To make use of these options, you need to purchase the wifi garden LED receiver in addition to the relevant article. When you purchase the wifi garden LED receiver, you get free access to the app.

Tip: We recommend that you lay the 230-volt cables approximately 60 cm below ground level to ensure that they are safely concealed.

The Faro LED ground light comes with a 5-year guarantee. You can read more about the product in the product specifications. For questions about this product, please contact our LED specialists.

Additional Information

Article number	L2090
EAN code	8721122621141
Brand	Hamulight
Suitable for	Outside
Light color	Warm white (2700K)
Input voltage	230V AC
LED chip	Cree
Consumption	10 watt
Dimmable	No
Lumen per LED (including lens)	900 lm
Color Rendering Index (CRI)	>82
Light angle	23 Degrees
Diameter	95 mm
Height	150 mm
Hole size	85 mm
Cabling per LED	100 cm
Transformer required?	No
Material	Stainless steel
Housing color	Nickel
IP value	IP67
IK value	IK08
Quality mark	CE, Rohs
Warranty	5 years
Energy label old	A++
Energy label new	F
