

Cree LED recessed spotlight Soria black in | square | warm white | 3 watt | dimmable | tiltable

Product Images

Short Description

The black Soria LED recessed spotlight square with an output of 3 watts is a stylish spotlight that illuminates your home with a beautiful warm white (2700k) light. This spot can be tilted and is dimmable.

Description

This stylish black recessed spot fits virtually any interior. The low height of the spot (35 mm) makes it possible for the Soria spot to fit in almost every lowered ceiling. Because the Soria has an IP value of 44 (IP-44), you can place it in every room in your house.

The Soria LED recessed spot is dimmable, which makes it possible to dim it with, for example, an LED rotary dimmer. Furthermore, you can tilt this spot to the desired position. This is ideal when you need more light in a certain spot in your house. The transformer that is included as standard ensures that the incoming current from the power cable is converted to low voltage. You connect the transformer directly to the power cable in your ceiling and then click the Soria spotlight onto the transformer.

There are several methods to control the spotlights. Below is a list of all available options:

- LED rotary dimmer Atlas
- LED push dimmer Novex
- Moon remote control
- App (upon purchase of wifi LED receiver, free access)

Take a look to the hole saw (size 35 mm), which you can use to make perfectly sized holes.

Tip: Switch off the power while installing the Soria spotlight
