

Cree LED ground light Serpa | warm white | 10 watt | round | 24 volts

Product Images

Short Description

The Cree LED ground light Serpa is suitable for illuminating a tree, shrub or object between 7 and 10 metres in height. This ground light is also suitable for illuminating a facade. The Serpa ground light has a consumption of 10 watts and is part of the 24-volt garden lighting system.

Description

The Cree LED spotlight Serpa has a nice warm white light colour (2700k) and a light angle of 23°. The Serpa ground light will certainly be an addition and will give off a very nice atmosphere in the garden. It is energy-efficient, environmentally friendly and uses only 3 watts. The ground light is made from stainless steel and has an IP value of 67, which means that it is dustproof and resistant to splashing and spraying water. The housing of this ground light is provided with a notch for the cable. The cable of the ground light can be routed via the notch and the cable will not be crushed in the ground. The cable that is attached to the ground light is 1 metre long and is equipped with a 24-volt connector.

The Serpa LED ground light is part of the 24-volt garden lighting system. This allows you to easily connect with other ground lights but also with another 24-volt garden lighting. To be able to do this, you need a 24-volt transformer. You have the choice between a LED transformer of 24 volts and an Astro 24 volt. The LED transformer 24 volts ensures that the incoming 230 volts are converted into low voltage, 24 volts. The Astro transformer also does this, but with this transformer, you have 5 different settings and you can control the lighting. You can connect up to 80 watts of different types of 24-volt garden lighting to both transformers. The transformers are not included but must be ordered separately.

There are several options to operate this ground spotlight. Below are a few ways:

- Astro transformer
- Moon remote control
- Push dimmer / Remote control Novex
- App

If you want to control the spotlights with the Moon, Novex and/or app, you need to purchase the wifi garden LED receiver. When you purchase this receiver, you get free access to the app that allows you to control the 24-volt garden lighting.

With the 24-volt extension cords and cable connectors, you can connect multiple Serpa ground lights or connect Serpa ground lights with other 24-volt garden lights from our range. These accessories are available on our webshop.

Tip: make sure you do not forget to add a 24-volt transformer to your shopping basket.

The Serpa LED ground light comes with a 5-year guarantee. You can read more about the product in the product specifications. For questions about this product, please contact our LED specialists.

Additional Information

Article number	L2184
EAN code	7435124543578
Brand	Hamulight
Suitable for	Outside
Light color	Warm white (2700K)
Input voltage	24V DC
LED chip	Cree
Consumption	10 watt
Dimmable	No
Lumen per LED (including lens)	900 lm
Color Rendering Index (CRI)	>82
Light angle	23 Degrees
Diameter	95 mm
Height	150 mm
Hole size	85 mm
Cabling per LED	100 cm
Transformer required?	Yes
Material	Stainless steel
IP value	IP67
IK value	IK08
Quality mark	CE, Rohs
Warranty	5 years
Energy label old	A++
Energy label new	F
