

Cree LED spike light Valbom | warm white | 5 watt | tiltable | 24 volts

Product Images

Short Description

The Cree LED spike light Valbom consumes 5 Watt and is suitable for lighting objects, trees and bushes from 4 to 7 metres in height. You can also light up a façade up to 7 metres high with the Valbom spotlight. This spotlight works on 24 volts and is, therefore, part of our 24-volt garden lighting system.

Description

Are you going to light a large shrub, tree or object 4, 5, 6 or 7 metres high? If so, the Valbom spike light is highly recommended. With its low energy consumption of 5 Watt and warm white light beam (2700k), the Valbom spotlight brings atmosphere to your garden. On the underside of the spot is a sharp pin. The sharp pin can easily be inserted into the ground and thus the spot can be (re)placed. The spot is tiltable and you can therefore determine how high the light beam shines. The Valbom spotlight is powder coated and has an IP value of 65 (IP65). This ensures that the spotlight is weather-resistant.

The Valbom LED spotlight is thus part of our 24-volt garden lighting system. The spot has a 1-metre cable with a 24-volt connector at the end. With this, you can easily connect the Valbom spotlight to other Valbom spotlights or another 2424-Voltaren lighting from our range. So, you can light up your whole garden with different 24 24-voltrden lightings.

24 volt garden lighting works with a 24-volt transformer. You need this transformer for the operation of the 24-volt system. This also applies to the Valbom spot. You can choose from 2 different transformers. The LED transformer converts the incoming 230-volt current to 24-volt. And the Astro LED transformer does the same, but this transformer can be programmed with 5 different settings. With these settings, you can operate the lights (or have them operated). You, therefore, need to order one of these transformers separately from our webshop for the operation of the Valbom spotlight. You can connect up to 80 watts of 24-volt garden lighting to both transformers!

Using 24-volt extension cords and 24-volt cable connectors, it is possible to connect several Valbom spotlights or other 24-volt garden lights with each other. These are available on our webshop.

Our 24-volt garden lights can be operated in a variety of ways. Here are some examples:

- Astro transformer
- Remote control Moon (requires a wifi garden LED receiver)
- Push dimmer/remote control Novex (requires a wifi garden LED receiver)
- App (requires a wifi garden LED receiver)

When you purchase the wifi garden LED receiver, you get free access to the app. To use the Moon or Novex, you need to add the wifi garden LED receiver to your shopping cart next to the relevant item.

Tip: do not forget to add a 24-volt LED transformer separately to your shopping basket.

There is a 5-year warranty on the Cree LED spike light Valbom. Read more product information in the product specifications and watch the product video. Do you have a question? Ask our LED specialists.

Additional Information

Article number	L2186
EAN code	7435124543592
Brand	Hamulight
Suitable for	Outside
Light color	Warm white (2700K)
Input voltage	24V DC
LED chip	Cree
Consumption	5 watt
Dimmable	No
Lumen per LED (including lens)	440 lm
Color Rendering Index (CRI)	>82
Light angle	50 Degrees
Diameter	60 mm
Width	110 mm
Height	305 mm
Cabling per LED	100 cm
Transformer required?	Yes
Material	Aluminium
IP value	IP65
Quality mark	CE, Rohs
Warranty	5 years
Energy label old	A++
Energy label new	F
