

Cree LED wall lamp Evora | warm white | 3 watt | up or down | 24 volts

Product Images

Short Description

The Cree LED wall light Evora is suitable for mounting against a wall, wall, or fence. The wall lamp is equipped with 1 spot with a consumption of 3 watts. You can choose whether the spot shines up or down. This Evora wall light works on 24 volts and is, therefore, part of our 24-volt garden lighting system.

Description

The Evora wall light is a real atmosphere creator. The wall lamp is equipped with 1 spot with a consumption of 3 watts. With its warm white light color (2700k), this lamp ensures that your garden is illuminated pleasantly. By tilting the wall lamp you can determine whether the wall lamp shines up or down. The Evora wall light is powder coated and therefore fully weatherproof. This is further confirmed by the IP-65 value of this wall light, IP-65 means that it is resistant to splash/spray water and dust.

The Evora LED wall light is therefore part of our 24-volt garden lighting system. The spot is a cable of 1 meter long with the 24-volt connector at the end. This allows you to easily connect multiple Ovar wall lights or with another 24-volt garden lighting. So, you can illuminate your whole garden with multiple 24-volt garden lights which provides a nice total picture.

24-volt garden lights work on a 24-volt transformer. You need this transformer for the functioning of the 24-volt system. You can choose from 2 different transformers. The LED transformer converts the incoming 230-volt current to 24-volt. And the Astro LED transformer does the same, but with this transformer, you can program it to 5 different positions and it can control the lights. You must therefore order one of these transformers separately from our webshop for the Evora wall light to work. You can connect up to 80 watts of 24-volt garden lighting to one transformer!

Using 24-volt extension cords and 24-volt cable connectors, it is possible to connect multiple Evora wall lights or other 24-volt garden lights with each other.

Controlling the wall lights is possible in several ways. For example, you can control them with the Moon or Novex remote control and the Hamulight app. Using the Moon, Novex or app requires the purchase of the wifi garden LED receiver. With the purchase of this receiver, the app can be accessed for free.

Tip: do not forget to add a 24-volt LED transformer separately to your shopping basket if you do not already have one.

You receive 5 years guarantee on this Evora wall light. Do you need advice or have a question about the Evora wall lamp? Feel free to contact our LED specialists. They are available every working day from 09:00 to 17:00. For more information about this wall lamp, you can also view the product specifications.

Additional Information

EAN code	7435124544520
Article number	L2189
Brand	Hamulight
Suitable for	Outside
Consumption	3 watt
Input voltage	24V DC
LED chip	Cree
Dimmable	No
Light color	Warm white (2700K)
Lumen per LED (including lens)	90 lm
Color Rendering Index (CRI)	>92
Light angle	3 Degrees
Cabling per LED	100 cm
Transformer required?	Yes
Diameter	60 mm
Width	80 mm
Height	130 mm
Material	Aluminium
IP value	IP65
Quality mark	CE, Rohs
Warranty	5 years
Energy label old	A++
Energy label new	G
