

Edison LED floor lamp Maia | warm white | 6,5 watt | 24 volts

Product Images

Short Description

The Edison LED standing light Maia is suitable for illuminating your driveway or a walkway. You can also use this lamp to lighten your plants, and perhaps you have a good idea of your own about where to put this stylish lamp. This lamp has a 360° angle of light and is part of our 24-volt garden lighting system. The lamp has an energy-efficient consumption of 6.5 watts.

Description

This stylish LED standing lamp is a real mood enhancer. With its warm white light (2700k) and a light angle of 360°, the Maia lamp illuminates a large area. The 6.5-Watt spotlight is protected by a sturdy cap that is resistant to the effects of weather (IP-65). The lamp is 40 cm high and has a 1-meter cable. At the end of the cable is the 24-volt connector, which allows you to connect multiple Maia lamps or to connect a Maia lamp with other 24-volt garden lighting.

The LED standing lamp Maia is part of the 24-volt garden lighting system. This means that you need a 24-volt LED transformer to operate this lamp. You can choose from the LED transformer 24 volts or the Astro LED transformer 24 volts. The 24-volt LED transformer ensures that the incoming 230 volts are converted to low voltage (24 volts). The Astro LED transformer 24 Volt also does this, but this transformer can be programmed to 5 different positions and can be used to control the lighting. You can connect up to 80 Watts of different types of 24-volt garden lighting to both transformers. Both transformers are not supplied as standard, so if you do not already have a 24-volt transformer, you will need to add one of the two transformers to your shopping basket.

Are you going to combine several 24-volt garden lights or do you need more cabling from the transformer to the Maia floor lamp? Then add an extension cable to your shopping basket as well. With the 24-volt cable connectors, you can connect multiple 24-volt lights together. These can also be found under the accessories of this lamp.

You can operate our floor lamps in different ways. The options are listed below:

- Remote control Moon (requires wifi garden LED receiver)
- Push dimmer / remote control Novex (requires wifi garden LED receiver)
- Our app (requires wifi garden LED receiver)

When you purchase the wifi garden LED receiver, you get free access to the app. To use the Moon and Novex, you need to add the wifi LED garden receiver to your shopping basket in addition to the relevant item.

Tip: 24-volt garden lighting is suitable for an easy way to illuminate your whole garden or various places in your garden.

For more product information, please contact our LED specialists, but also take a look at the product specifications of the LED floor lamp Maia. Perhaps your question will be answered then.
