

Cree LED wall lamp Pombal | warm white | 7 watt | 24 volts

Product Images

Short Description

This Cree LED wall lamp Pompal is suitable to mount against a wall, wall, or fence. The wall lamp has a consumption of 7 watts. This stylish wall lamp works on 24 volts and is, therefore, part of our 24-volt garden lighting system.

Description

With its stylish design and warm white light (2700k), Pompal wall lamp creates an atmosphere in your garden. The warm white light shines up and down with a light angle of 120°. The Pompal wall lamp is powder coated and therefore fully weatherproof. This is again confirmed by the high IP65 value of this wall lamp.

The Pompal LED wall light can be connected to our 24-volt garden lighting system. The spot is a cable of 1 meter long with the 24-volt connector at the end. This allows you to easily connect multiple Pompal wall lights or with another 24-volt garden lighting. So you can light your whole garden with multiple 24-volt garden lighting.

24-volt garden lighting works on a 24-volt transformer. You need this transformer for the functioning of the 24-volt system. You can choose from 2 different transformers. The LED transformer converts the incoming 230 volts current to 24 volts. And the Astro LED transformer does the same, but with this transformer, you can also program it with 5 different modes and it can control the lighting. So you need to order one of these transformers separately through our webshop for the operation of the Pompal wall lamp.

Through 24-volt extension cords and 24-volt cable connectors, it is possible to connect multiple Pompal wall lights or another 24-volt garden lighting. These accessories are available on our webshop.

Tip: create a lighting plan for your garden to create a beautiful overall picture

This wall lamp comes with a 5-year guarantee. More information about this lamp can be found in the product specification. Also, take a look at the product film.
