

Sanan LED strip Avila | warm white | 24 volts | different lengths

Product Images

Short Description

The LED strip Avila is suitable for lighting your porch. The strip is dimmable and consumes 5 watts per metre. This strip is 24 volts and needs to be connected to one of our 24 volt LED veranda transformers. The strip is available from 1 to 7 metres.

Description

The Avila LED strip is an excellent option if you do not want to make holes in the beams of your porch. The strip's warm white light (2700k) is both functional and atmospheric. The strip counts 512 LEDs per metre and is 5mm high and 11mm wide. The IP-66 rating ensures that the strip is highly resistant to water and dust.

To supply the strip with the right power, you also need to purchase one of the 24-volt LED strip transformers. Do you want to dim the strips? Then you have a two options. Option 1 is to add the Wifi LED receiver to your shopping basket. With this receiver, you make it possible to control and thus dim the spotlights with the Hamulight app. Would you also like to operate the spotlights with a remote control? Then you will need to purchase the Moon remote control in addition to the receiver. Option 2 is to combine the strips with the Somfy io system. In this case, you will need to purchase the Somfy io LED receiver and the Somfy io remote control A/M.

You might also be interested in one of the handy accessories for this strip. For example, you can extend the cable with a strip extension cable. Do you want several strips in your porch? Then the 24 volt veranda cable connectors Y are ideal! This way, you connect several strips to one transformer.

Tip: You can cut the Avila LED strip every 60 mm. You can then use the Avila cover caps to seal the strip.
