

Cree LED spike light Lapa | warm white | 1 watt | tiltable | 24 volts

Product Images

Short Description

The Cree LED spike light Lapa consumes 1 watt and is ideal for illuminating objects, trees and bushes up to 3 metres high. You can also light up a façade up to 3 metres high and ponds with the Lapa spike light. This spotlight works on 24 volts and is, therefore, part of our handy 24-volt garden lighting system.

Description

Are you going to light an object, tree up to 3 metres high? If so, the Lapa spike light is a good choice. But a pond can also be well illuminated with this spike light bollard. Make sure that you do not mount the spotlight in the pond! With its energy-efficient use of 1 watt and warm white light beam (2700k), the Lapa Spotlight creates a cosy atmosphere in your garden. On the bottom of the spotlight is a sharp pin. This sharp pin can easily be inserted into the ground and thus the spot can be (re)placed. The spot is tiltable and you can therefore determine how high the light beam shines. The Lapa spotlight is powder coated and has an IP value of 65 (IP65). This ensures that the spotlight is completely weatherproof.

The Lapa LED spotlight is part of our 24-volt garden lighting system. The spot has a cable of 1 metre with a 24-volt connector at the end. With this, you can easily connect multiple Lapa spike lights or with another 24-volt garden lighting. So you can light up your whole garden with multiple 24-volt garden lights.

24-volt garden lights work with a 24-volt transformer. You need this transformer to make the 24-volt system work. You can choose from 2 different transformers. The LED transformer converts the incoming 230-volt current into 24 volts. And the Astro LED transformer does the same, but with this transformer, you can also program it to 5 different positions and it can control the lighting. You, therefore, need to order one of these transformers separately from our webshop for the operation of the Lapa spotlight. On both transformers, you can connect up to 80 watts of 24-volt garden lighting!

Using 24-volt extension cords and 24-volt cable connectors, it is possible to connect several Lapa spotlights or other 24-volt garden lights with each other. These accessories are available on our webshop.

Below are the different ways you can operate our 24-volt garden lights:

- Astro transformer
- Remote control Moon (requires a wifi garden LED receiver)
- Push dimmer/remote control Novex (requires a wifi garden LED receiver)
- App (requires a wifi garden LED receiver)

When you purchase the wifi garden LED receiver, you get free access to the app. If you want to use the Moon or Novex, you need to add the wifi garden LED receiver to your shopping basket in addition to the relevant item.

Tip: do not forget to add a 24 volt LED transformer separately to your order.

There is a 5-year warranty on the Cree LED spotlight Lapa. Read more product information in the product specifications. Do you have a question? Ask our LED specialists.

Additional Information

Article number	L2350
EAN code	7435124558527
Brand	Hamulight
Suitable for	Outside
Light color	Warm white (2700K)
Input voltage	24V DC
LED chip	Cree
Consumption	1 watt
Dimmable	No
Lumen per LED (including lens)	90 lm
Light angle	60 Degrees
Diameter	36 mm
Width	110 mm
Height	180 mm
Hole size	NA
Cabling per LED	100 cm
Transformer required?	Yes
Material	Aluminium
Housing color	Black
IP value	IP65
Quality mark	CE, Rohs
Warranty	3 years
