Short Description

The Berga is a dimmable 3-watt recessed LED spotlight that shines with a nice warm white light colour (2700k).

Description

This Berga LED recessed spot is a versatile LED spot. This is because the Berga recessed spot is dimmable, allowing you to dim the spot using, among other things, an LED dimmer. The IP-65 value of the Berga spotlight allows you to place it in any room of your house. The spot is highly resistant to dust and splashing water.

The small LED transformer is included as standard. This is how you connect the transformer to the power cable. On the other side is a coupling piece. The Berga spotlight has the same coupling piece and you use it to click the spotlight onto the transformer. The transformer converts the incoming 230 V to a safe low voltage.

You have several options for controlling the spots. All options are listed below:

- LED rotary dimmer Atlas
- LED push dimmer Novex
- Remote control Moon
- App (with purchase of wifi LED receiver free access)

For making holes where the spotlight fits exactly, the hole saw (with a size of 35 mm) is ideal. You can find these under the accessories heading and then under hole saws.

Tip: disconnect the power before mounting the Berga LED recessed spotlight.

When ordering this Berga recessed spot, you will benefit from the 3-year warranty on the spot. Would you like more information about the Berga recessed spot? Then look under the heading specifications. Do you still have questions? Contact us by phone, e-mail or chat. We are available every working day from 09:00 to 17:00.

Additional Information

Article number	L2378
EAN code	8721122620403
