

**Cree LED recessed spotlight Soria in | square | warm white | 3 watt | dimmable | tiltable | different colours**

## Product Images

## Short Description

---

The Soria LED recessed spotlight square is a beautifully finished recessed spot that shines with a nice warm white (2700k) light. The spot has an output of 3 watts and is also tiltable and dimmable.

## Description

---

The Soria LED recessed spot square can be used in any direction. The spot is dimmable and tiltable! You can therefore dim this spot to the desired amount of light and if you need more light in a particular place, you can also tilt the spot. This square variant of the Soria recessed spotlight can easily be used with existing holes in your ceiling. But even if you don't have any holes, this spotlight is highly recommended.

The Soria recessed spot has a low height (35 mm), which makes it suitable for almost every ceiling. The IP-44 rating of the Soria recessed spotlight makes it possible to install this spotlight in every room in your house.

A transformer is included with every Soria LED recessed spotlight. You have to connect the transformer directly to the power cable in the ceiling. On the other side of the transformer is a connection piece that you can use to click the Soria spotlight into the transformer.

There are several methods to control the spotlights. Below is a list of all available options:

- LED rotary dimmer Atlas
- LED push dimmer Novex
- Moon remote control
- App (upon purchase of wifi LED receiver, free access)

Our hole saws (53 mm) are also worth checking out. These allow you to make holes in the perfect size. This ensures that the spotlight fits exactly in the hole.

Tip: we advise you to disconnect the power while installing the Soria recessed spotlights.

You can find more information about this recessed spotlight in the product specifications. Do you still need more information? Please contact us.
