

Hamulight LED push dimmer Novex | white | 4-channel

Product Images

Short Description

This 4-channel pressure dimmer Novex is perfect for combining with our veranda BAS sets, recessed spotlights, LED strips and garden lighting. You can mount the dimmer on a wall or use it as a remote control. To use this dimmer, you need to purchase one of our wifi LED receivers.

Description

This 4-channel Novex pressure dimmer allows you to control your Hamulight lighting. Note: To use this remote control, you need to purchase one of our wifi LED receivers. Which receiver you need depends on the type of lighting. We have a receiver for garden lighting, one for recessed spots and one for LED strips.

If you want to use these for your garden lighting, you need to take into account that you can only switch the lighting on and off, as the garden lighting itself is not dimmable.

You can attach the Novex to a wall but you can also use it as a remote control!
