

Sanan LED recessed spotlight veranda Parla los | warm white | 3,5 watt | 24 volt

Product Images

Short Description

The Parla LED recessed spotlight has an power of 3.5 watts and shines (2700k) warm white light. The spot is dimmable and runs on 24 volts.

Description

The Parla recessed spot is a true all-in-one spot. It is dimmable and comes with two cables of 20 cm each. This allows you to easily connect this spot to the next one. In addition to this spot, you need to buy a 24-volt veranda transformer to provide the Parla spot(s) with the right power. The 24 volt veranda Y-cable connectors enable you to lay the 24 volt veranda extension cables to the beams of your veranda. Then you just need to connect the Parla spotlights to the extension cables and loop them together. The last spot in the beam has a cable left over. You need to cover this with the cap supplied as standard.

The Parla recessed spot has a protection rating of IP-65, making it weatherproof. With a recessed size of 35 mm, a height of 30 mm and a diameter of 40 mm, the Parla fits in any canopy. With a 90-light angle of illumination, the Toledo illuminates a wide area.

You can combine the Parla recessed spot with the wifi LED receiver. This receiver allows you to control the spotlight with:

- The pressure dimmer Novex
- The Moon remote control
- App (free access with purchase of wifi LED receiver).

Do you still need to make holes for the recessed spots? Then order a hole saw (size 35 mm) to make perfectly sized holes.

Tip: you will need the transformer, cable connectors and extension leads to mount this spotlight. You need to order these items separately via our webshop.

You will find more product specifications under the heading specifications. For questions and/or advice, please feel free to contact our LED specialists.

Additional Information

Article number	L2396
EAN code	7435852519517
